[NCTM Regional](#)  
Louisville, KY

December 2 - 4  
[LACUE](#)  
New Orleans, LA

### Halloween Humor

What do you get when you divide the circumference of a jack-o-lantern by its diameter?

### Product News

Now there is a better way for new teachers to become acquainted with Ascend Math, the new [Introduction to Ascend Math](#) video. This video is conveniently located on our Knowledge Base and under the Administration tab in your Ascend School.

After viewing the video new teachers should register for Quick Start Training. This is the best way to get a quick jump on using Ascend Math effectively. Find out more about Quick Start Training at <http://ascendmath.com/training.html>.

### Tip of the Month

Want to review the number of objectives completed and total hours worked for a given time frame? Then you are looking for the Activity Completion Report. The Activity Completion reports may be accessed on the Reports Tab within Ascend Math.

## Partner School Highlight

Congratulations to the students and teachers of Delaware Elementary and Daniel Wertz Elementary in Evansville, IN. They are off to a great start this year. Already, 29% of Delaware students using Ascend Math have gained at least one level. As if that were not impressive enough 49% of Daniel Wertz students have gained one level growth. Some pretty remarkable results for less than two months into the school year! We expect to see tremendous growth from both of these schools as the year progresses.

### Delaware Elementary Students work on Ascend

### Daniel Wertz Elementary Students use Ascend in classroom

## A Gift For You

Drop by and say hello to us at any of these conferences and we'll give you an "I Teach Extraordinary Kids" t-shirt. NCTM Las Vegas, NCTM Louisville, LACUE.

## Announcing the Ascend Math Blog

Be sure to check out our weekly blog for insights, developments, strategies and ideas of interest to and from educators like you. Often, we will invite guest bloggers to share their expertise and strategies to make all students successful in math. You can find the blog on our website [www.ascendmath.com](http://www.ascendmath.com)
