**FOR IMMEDIATE RELEASE**

**ASCEND MATH AVAILABLE FOR IPAD IN JULY, 2012**

**Shreveport, LA (April 17, 2012)** Ascend Education announced today that Ascend Math, the award-winning online math intervention solution will be fully functional on all tablets including iPads in time for the start of next school year.

Over the past year, more and more educators have asked us when Ascend Math will be available for the iPad,” said Kevin Briley, CEO of Ascend Education. “I’m happy to report that as of this fall, Ascend Math will be among the first math intervention solutions fully functional on the iPad.”

This fall, students using Ascend Math will have the option to log in as they always have and wirelessly view the award-winning video instruction and explorations within all of Ascend Math’s K-12 grade levels on an iPad. Students using Ascend Math on the iPad will have the same experience as with the computer-based version of the product, taking end of objective quizzes and receiving instant feedback through the Ascend Climber. The wealth of digital content will appear in the same high resolution as on a computer.

All of Ascend Math’s comprehensive reporting will also be accessible on the iPad, providing convenience and flexibility for educators.

“Devices like the iPad offer yet another important option to deliver instruction and assessment aimed at closing math skill gaps and getting students back up to grade level quickly,” reported Briley. “This is one more important step in eliminating the issue of students waiting for access to limited classroom computers.”

Ascend Math was honored recently by both eSchool News and District Administrator magazine with their Readers’ Choice awards.

**About Ascend Math®**

Ascend Math® is a research based instructional resource in which students have proven to achieve two or more grade level gains in a six month period. This web delivered individualized intervention identifies skill gaps, prescribes targeted instruction, and motivates students to achieve their maximum performance and potential.

Study plans align by grade level to National Council of Teachers of Mathematics (NCTM) standards, Core Curriculum and state standards. Instruction is delivered in a logical math sequence and students can progress at their own pace and track their own progress and

success. Ascend Math<sup>®</sup> is currently used by hundreds of schools and districts serving tens of thousands of students throughout the U.S. and Canada. Visit [www.ascendmath.com](http://www.ascendmath.com)
