FOR IMMEDIATE RELEASE
ASCEND EDUCATION RELEASES JUST IN TIME STUDY PLANS

Shreveport, LA (March 8, 2023), Ascend Education is pleased to announce new alignments to support a Just in Time approach to math learning. The new Just in Time alignments allow students to move adaptively through any unfinished learning related to topics taught during whole class instruction. The units in the Just in Time alignments contain lessons aligned to the supporting standards of grade level standards taught in class. With the click of a button, teachers may assign these supporting lessons to all students or to students that appear to be struggling in class. Ascend Math's adaptive architecture identifies the supporting standard each student needs and dynamically assigns this material. By focusing only on the gaps, Ascend Math will efficiently address unfinished learning and accelerate math achievement.

"With the challenges of unfinished learning accelerated by school closures the past few years, this new study plan closely aligns with the need to accelerate learning for all students. In addition, the automated JIT plans reduce teachers' time burden of creating differentiated study plans with manual assignments. "We recognize that teachers are working harder than ever, and this is a way to reduce some of the time demands placed on teachers" said Kevin Briley, CEO, Ascend Education. "We are extremely pleased to work with districts to provide these additional targeted instructional resources"

Focused specifically on accelerating learning to address math skill gaps quickly, Ascend Math is successfully implemented in a wide range of instructional settings, including before/after school programs, classrooms, blended learning classrooms, alternative learning environments and for at home use including synchronous and asynchronous learning environments.

To learn more about the Just in Time approach, please email info@ascendmath.com.

About Ascend Math®

Ascend Math® is personalized online math instruction that provides each student with a unique study path through skill gaps at each level. Individual study plans are prescriptive, adaptive and automatically assigned.

Ascend Math® has demonstrated results that enable students to grow two or more grade levels in one semester. This research-based program is an online individualized instructional resource which identifies skill gaps, prescribes targeted instruction and motivates students to succeed. Schools may use Ascend Math as a Core Math Curriculum or a Supplemental Math Curriculum to target the needs of special populations including Tier II and Tier III Interventions, Special Ed, High Ability, Algebra Readiness, Acceleration and Credit Recovery.

Ascend's fully automated solution reduces the demands on teachers' time. Ascend's approach supports improved math achievement regardless of students' reading levels. This resource provides important support for ELL and students with special needs using video, audio, and multimedia components. Ascend's real-time reports will assist in simplifying progress monitoring and helping meet Federal audit guidelines.

Study plans align by grade level to rigorous state standards. Instruction is delivered in a logical math sequence and students can progress at their own pace and track their own progress and success. Ascend Math is currently used by hundreds of schools and districts serving tens of thousands of students throughout the U.S. and Canada. Visit www.ascendmath.com
