**FOR IMMEDIATE RELEASE**

**NEW “LIVE STUDENT TRACKER” NOW AVAILABLE TO ASCEND MATH TEACHERS**

**Shreveport, LA 8/18/2015** Ascend Education announced today the addition of a Live Student Tracker to its Ascend Math intensive math intervention product. The Live Student Tracker is a real time report on individual student progress within an Ascend Math class.

“When we asked teachers using Ascend Math what enhancements they wanted to see next, one of the most common replies was for an easy way of viewing real-time student progress,” said Kevin Briley, CEO of Ascend Math. “We are pleased to announce the Live Student Tracker, ready in time for the beginning of this school year.”

The Live Student Tracker provides critical, real-time information for each student in the class including:

- The objective, unit and level currently being worked
- Attempts at post-assessment
- The time of the last post-assessment attempt
- The next objective in that student’s study plan
- Link to the Class Dashboard for more detailed information

“The Live Student Tracker makes group instruction easier by allowing the teacher to see at glance the current needs of all their students,” added Briley. “Already we are hearing a groundswell of positive comments for the Live Student Tracker. The addition of the live tracker coming on the heels of the Teacher and Class Dashboards will make monitoring progress faster and easier than ever for educators using Ascend Math.”

A sample of the Live Student Tracker can be viewed at

**About Ascend Math®**

Ascend Math is intensive math intervention that meets each student at their lowest skill gap and guides each through an individualized study plan, often resulting in 1-2 grade levels of improvement in the first few months.

Ascend Math is research based and written to today’s rigorous state standards including Common Core. Instruction is delivered in a logical math sequence allowing students to progress at their own pace, tracking their own progress and success. Ascend Math® is currently used by hundreds of schools and districts serving tens of thousands of students throughout the U.S. and Canada. Visit [www.ascendmath.com](http://www.ascendmath.com)
