- **April 25 – 28** [NCTM](#), Pennsylvania Convention Center, Philadelphia, PA

Tip of the Month - Activity Reports

We are excited to present to you the new Activity Reports - Activity Completion Report and the User Login History Report. These reports are now available within Ascend for both teachers and administrators. The Activity Completion Report displays the amount of activity completed by students for a specific date range grouped by level or class. The User Login History Report allows teachers to view the login history for students and allows Administrators to view login history for teachers and students. Administrators can access these reports within the Reports Menu and Teachers can access the reports within the Administration Menu. For more information on the Activity Reports, please contact Ascend Customer Support at support@ascendmath.com.

Recent News: Coming Soon Level Recommendation in Spanish

The Spanish version of the level recommendation will allow teachers and administrators to identify math gaps regardless of student mastery of the English Language. Click [here](#) to view.

Ascend Math Partner School Highlight

Sullivan CUSD #300 has quite a few “busy bees” using Ascend! Students have been hard at work filling in skill gaps, so much so that over 40% of the students using Ascend have made significant grade level gains! Congratulations to Sullivan on all of their success!!

Facebook Surprises!

There are some great things to see on our Facebook site including videos and special announcements. Check it out and be sure to “[Like](#)” us while you’re there.

Give us your favorite/Share your Success tip and Coffee is on us!

Do you have helpful Ascend tips or success stories you’d like to share? We would love to hear what’s working for you and share the tips with other educators in our monthly newsletter. Please submit your successful tips [here](#) and receive a cup of Starbuck’s coffee on us! We will select one tip each month to publish in our monthly newsletter.

Ascend Math has proven results that can drive students to achieve up to two grades levels in one school year! This on-line individualized intervention resource identifies skill gaps, prescribes targeted instruction and motivates students to achieve their maximum performance.
