"Ascend Math has been a great tool to complement our high school resource math curriculum. Our students use the program twice per week and we have observed tremendous growth: about 30% have already completed a level, 10% of those are about to complete their second and well above 60% are on their way to finish their first. The program allows both virtual and in-person learners to practice at their own pace to fill gaps, improve skills, and accelerate their learning. The variety of available reports are very useful for monitoring students' work and progress. My students receive an official certificate of completion every time they finish a level and that has had a huge impact on their motivation. They have started watching their own progress and even competing against each other!"
